

# Results from the ASHC Return to Campus Survey

Brian Lofman, PhD.,  
Matthew Trengove, PhD.

*Institutional Planning Research & Effectiveness (IPRE)*  
*April 20, 2021*

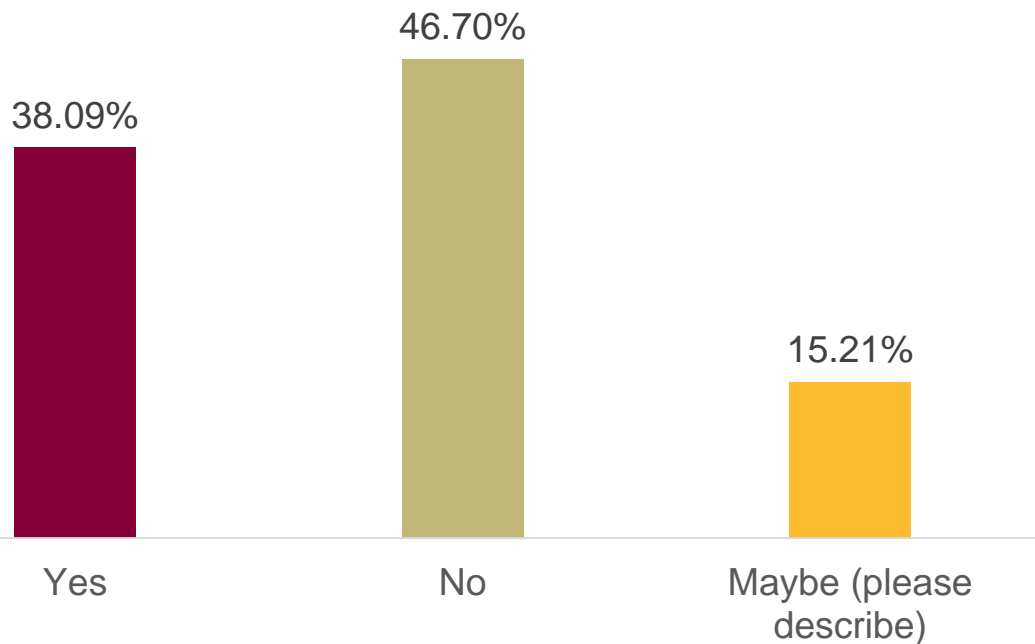

**Evaluate student perceptions/attitudes on a return to in-person learning**

- **Response Rates: 9.5% (OR 744 respondents)**

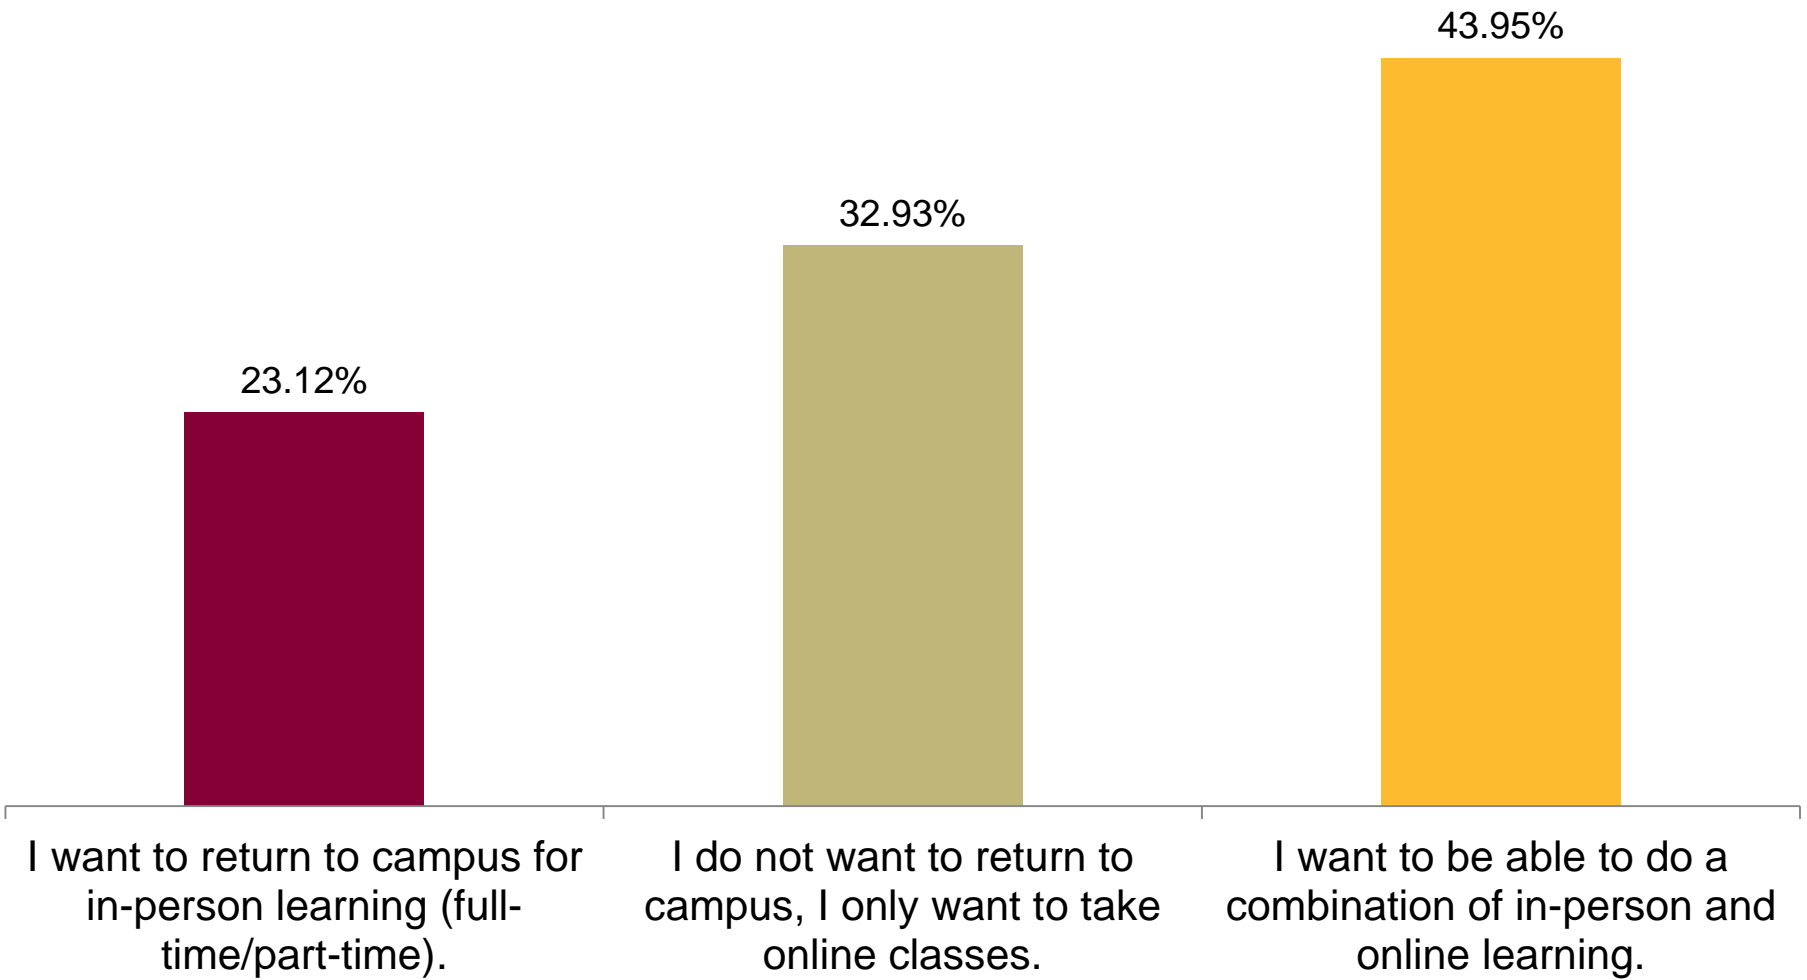

Do you want to return to campus (i.e., take in-person courses)?

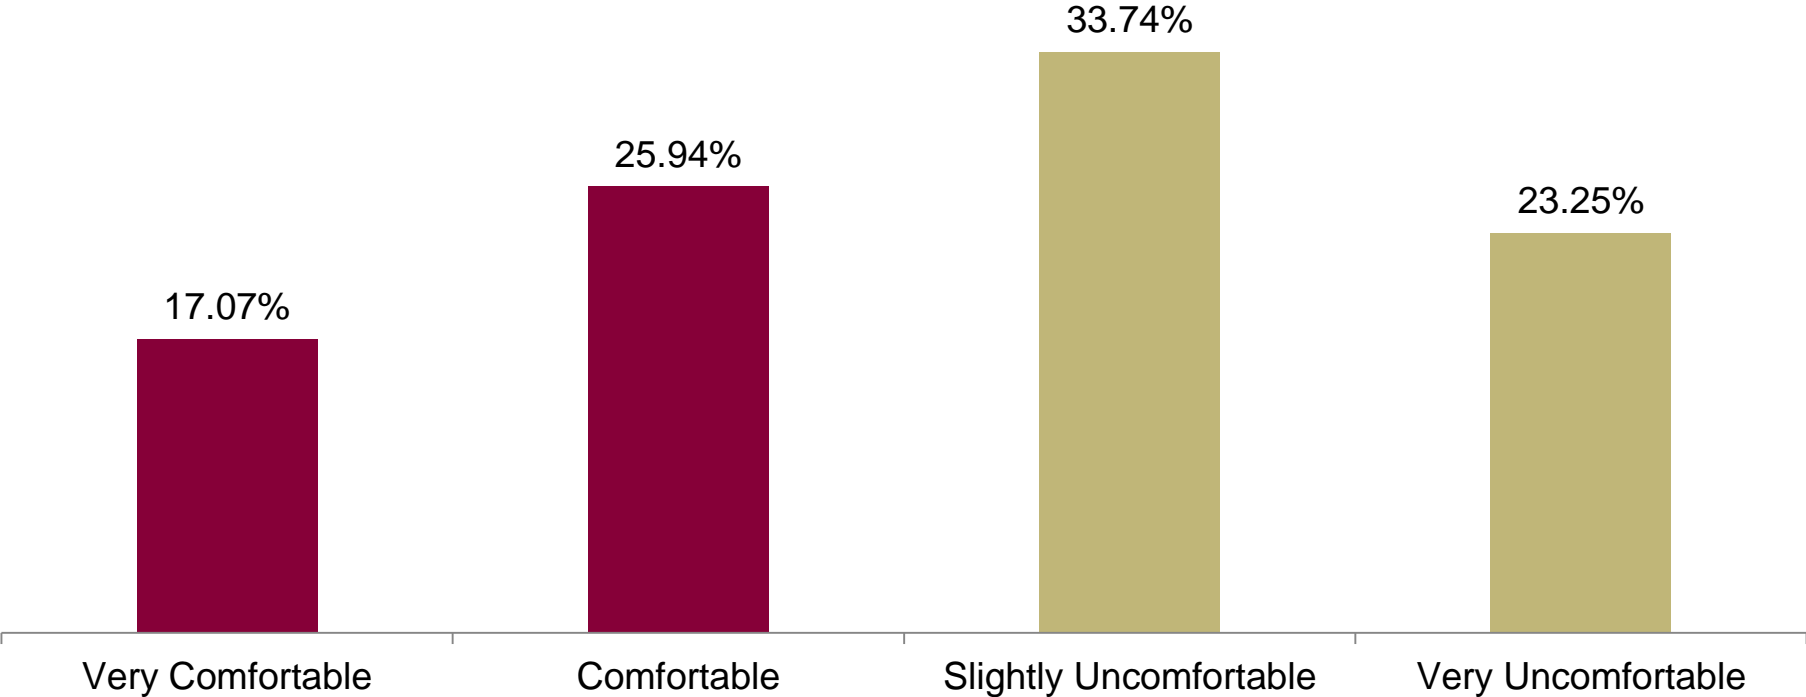

Yes	283
No	347
Maybe	113

Safety Concerns	54 (47.79%)	
Online Convenience	17 (15.04%)	
Prefer Hybrid	16 ( 14.16%)	
Depends on Course	16 (14.16%)	
Transportation	3 (2.65%)	
Kids	2.65%	3 (2.65%)
N/A	2.65%	3 (2.65%)

When Hartnell resumes in-person learning following safety protocols:

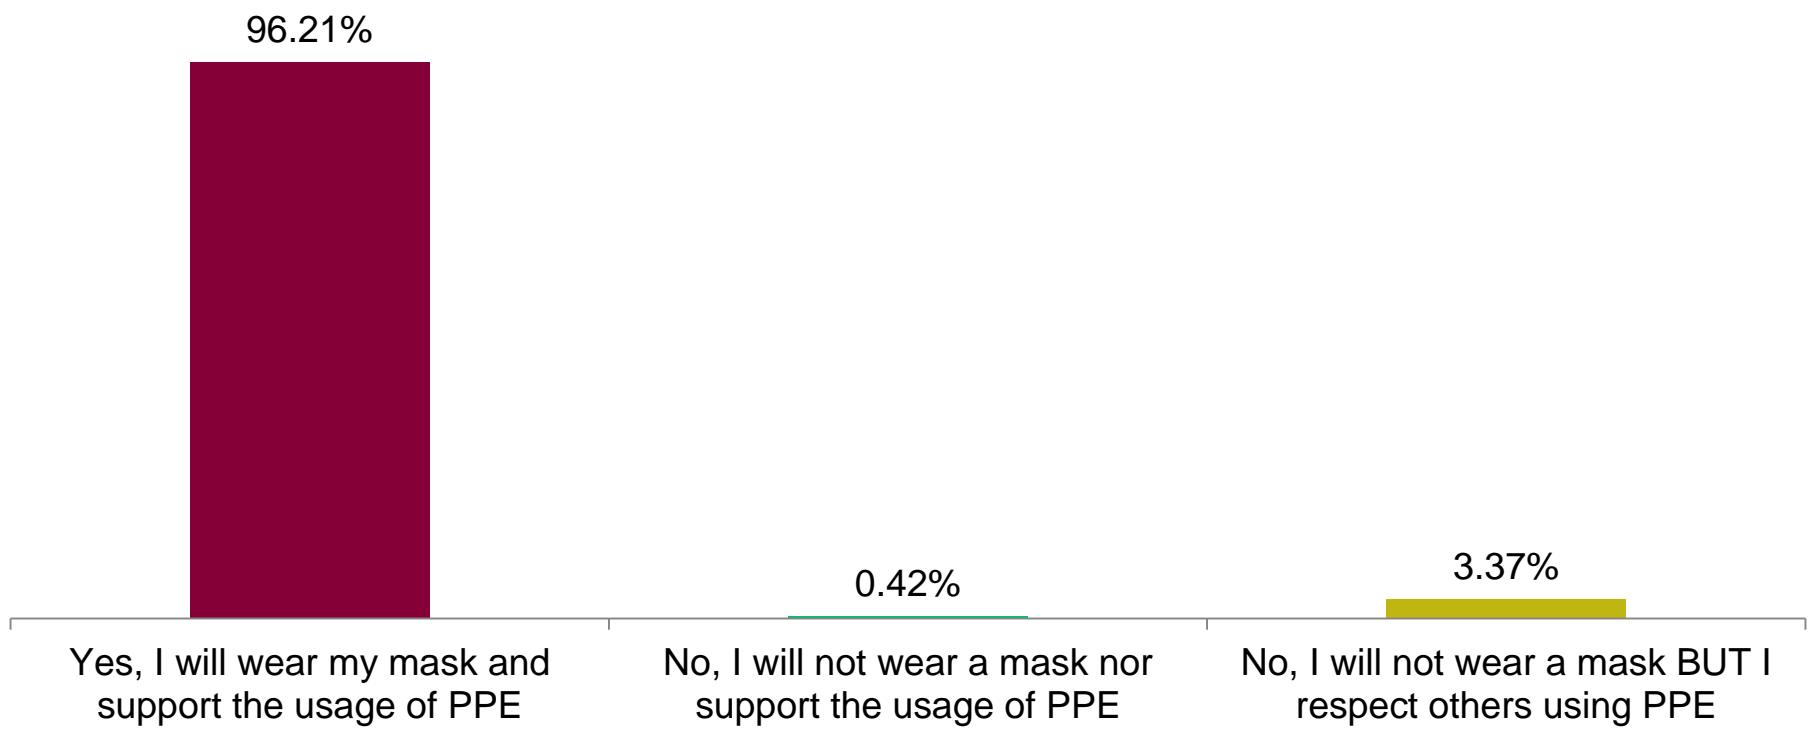

How comfortable do you feel about returning to campus in the near future (e.g., 2021FA)?

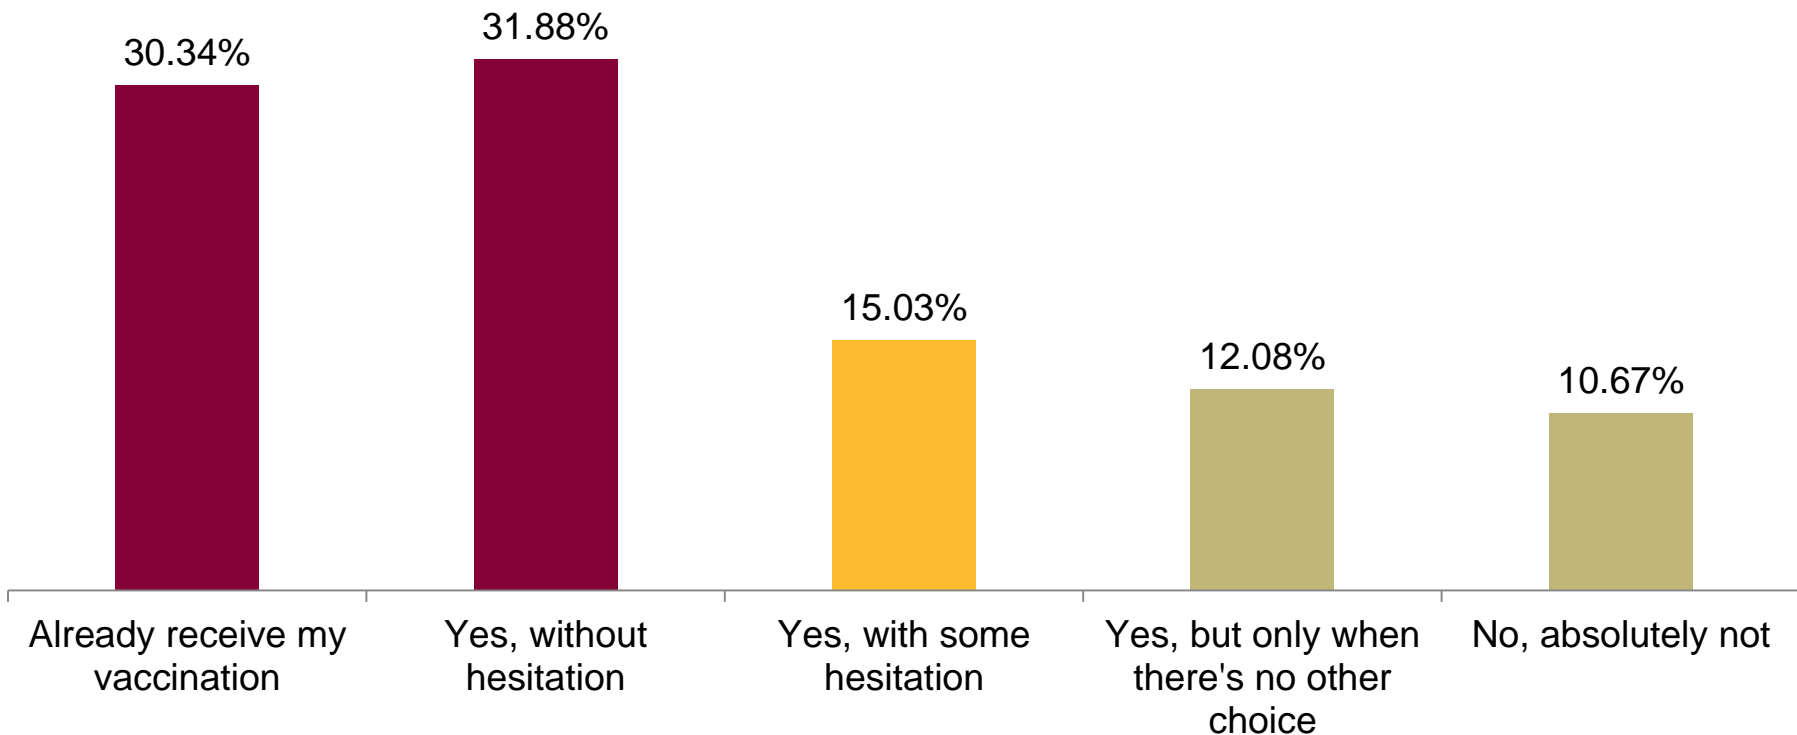

**57% (n=424) were slightly/very uncomfortable returning to campus in 2021FA, with biggest concern (87%) being personal/family health (ASHC, Q4)**

Will you support having teachers, students and visitors wear masks and other Personal Protective Equipment (PPE) when the campus reopens?

If you were offered the opportunity, would you choose to receive a vaccination for COVID-19?

**77.3% said that they have already or would receive a COVID vaccination**  
**68.1% said that it's extremely important (mandatory) or very important to vaccinate all students, faculty, staff and administrators before resuming in person learning (ASHC, Q7).**

- Would the library have any chance of opening soon?
- Study/test rooms should be offer for students taking exams, like TEAS test, which it's a 4-5hrs test, and some of us don't have reliable internet at home
- I would like more student help for us struggling students
- Why is other schools and universities in the area allowed to open but not Hartnell?
- If classes do go back that means class sizes with be smaller, does that mean when registering for classes, they'll fill up even faster ?
- My one concern for the school reopening is Hartnell College needs to make sure all programs are open, for example the childcare facility for single parents of young children. I feel it would be rushing to quickly to reopen the college If the child care facility was not open because that puts many parents like myself in a position where we might have to wait to achieve our educational goals.
- I would like for all teacher to do zoom classes because some teachers just record them self and its hard to get in contact with then if they do not do zoom classes they just record them self
- Would we HAVE to be vaccinated to return to in-person classes in the future? Would those who are not vaccinated be excluded or not allowed on campus at all?
- My question is if school were to reopen do you guys have an specific day or month?
- This semester we should just finish the online semester as it is, and the new semester should be in person.

- We should set up vaccination clinics for students and employees on-campus during summer and fall, get the College President, VPs and Board to model getting the shot, work with the county and medical, and make a very public attempt to encourage vaccination in our community in English and Spanish. We should make a huge push in South County as well.
- I recently lost my uncle because of Covid and for me is really important that everyone take the necessary measures in order to go back and take it seriously.
- The switch to online school has not just affected me but it has affected everyone in my household. Friends and Family tell me how they struggled to the switch to online. In person schooling is just very different than online. Teachers struggle to get students attention since most students think that they can do what they want or slack on work just because it's online. Most students don't participate because it's online and they "don't need their cameras on". Even though there is a pandemic going on the vaccine should be a requirement for everyone so we can at least feel safe in the classroom again. I mean middle school students need to get the chicken pox vaccine to get able to get to school it's possible we can do this as well for all schools again.
- I think people should do what is best for the community safety
- Even if people do not want to wear their mask i feel that it should be a right for those who decide to wear the mask.
- I'll feel safe when the vaccine has been thoroughly tested.
- CDC changes guidelines frequently. They are not too clear on how long the covid vaccine stays in a persons body. Too early to receive the vaccine. I'm not convinced

Thanks for your attention

HARTNELL COLLEGE
